AFFIDAVIT OF LAURA MEDINA

State of California

Los Angeles County

I, Laura Medina, attest that my statements are true to the best of my knowledge.

Comment round for ET Docket No. 03-137 and WT Docket No. 12-357.

1. My name is Laura Medina. My address 1801 S Greenville St. Santa Ana Ca, 92704
2. Yo soy una madre promotora que se preocupa por su comunidad y madre que no le gustaría que sus hijos tengan consecuencias MEDICAS que están enfermado a mi comunidad y quiero tener una vida de buena calidad.
3. I was shocked to learn that RF Guidelines have been set without the benefit of credible studies performed on the health impact to humans, animals, and environment relative to RF impact.
4. I have been in the Information Technology Industry for 30 years. I have led a technology training non-profit corporation for over 20 years.
5. El motive de mi reclamo es que toda mi comunidad se entere de lo que quieren hacer.
6. There are compelling arguments supporting the FCC modify RF Guidelines mandating inclusion of credible studies performed on the health impact to humans, animals, and environment relative to RF impact, and that those guidelines work to prevent or minimize negative impacts.
7. Over two (2) million viewers/subscribers have seen and/or read about the positive impact One Million NIU has had on families and community relative to empowering NIU's (New Internet Users) to early adaption of on-line resources for improved quality of life.

8. The documentary by James Russell, [Resonance – Beings of Frequency](#)(Nov2012) explains well the impact RF waves have on the very existence of life and how the Earth's magnetic field's share space with RF waves. They must co-exist, to stymie the Earth's delicate balance of these waves threaten the very existence of life. Such hypothesis warrants inclusion in considering RF Guidelines.

9. Dr. Roger Coghill, Bioelectromagnetic research, "the radiation environment has increased many millions of times from what it was 30 years ago." Understanding the impact of this "million times increase" is worthy of consideration into the writing of RF Guidelines, as it is hypothesized to have negative health impacts.

Respectfully submitted by

Laura Medina
